

IO-M 500 - I/O hardware modules for UMD measuring devices

Download data sheet

IO-M 500

You can use the IO-M 500 modules to add digital inputs, relay outputs or temperature inputs to the UMD measurement devices. Therefore, in addition to the inputs/outputs present on the UMD, further signals can be recorded or output.

Application:

- Connection via RS485
- Pulse recording
- Status messages
- Alarm signals
- Temperature recording

Supply voltage	Functions			Communication	Type	Order no.
	Digital inputs	Relay outputs	PT100			
12-24 V DC	4*	-	-	RS485	IO-M 540	80.33.3802

* active inputs
